2. Bud Wheelon mentioned a new concept of information storage by the National Cash Register Company which represents a concentration of information on a new form of film which can be retrieved through a viewer. Wheelon suggested that the DD/S and the DD/P consider this as a possibility for information storage and retrieval. I have asked DD/S&T to supply us with what information they have.

3. The bulk of the meeting was spent on the Vietnam reactions and future possibilities.
